■ Table G-3 Reptile species recorded

Family Species	Common Name	Supp. EIS Number	Qld Status	C'wealth Status	Locations			EIS 1998 Survey
					Nth end	Central region	Sth end	
Scincidae								
<i>Cryptoblepharus litoralis</i>	Litoral skink	<10	C		X	-	-	
<i>Cryptoblepharus virgatus</i>	Fence skink	<10	C		-	-	X	
<i>Ctenotus robustus</i>	Robust skink	2	C		-	X	X	

Supp. EIS Number column is approximate number of individuals seen. N = numerous (more than 10 seen) during the supplementary EIS survey. Observations were opportunistic.

Qld Status is the species' status according to the *Nature Conservation (Wildlife) Regulations 1994*. C = Common; R = Rare; I = Introduced.

C'wealth Status is the species status according to the *Environment Protection and Biodiversity Conservation Regulation 2000*. E = Endangered; V = Vulnerable; M = Migratory (under migratory).

Locations are approximate. 'Nth end' is from rocks at northern extent of proposed development, south to southern limit of 'moored' boats; 'Central' is from there to bus shelter; 'Sth' is remainder. X = present; B = breeding; T = Tracks (the animal's presence was only noted in the area through its tracks).

1998 EIS are species identified in the July 1998 EIS surveys by WBM: Y = Present; I = intertidal zone; m = mangrove.
