TABLE OF CONTENTS

ES1.	Executive Summary	1
1.	Introduction	1-1
1.1	Purpose of the Environmental Impact Statement	1-1
1.2	Project Proponent	1-1
1.3	Project Location and Project Area	1-1
1.4	Project Overview	1-5
1.5	Scope of Activities Included in the Project	1-7
1.6	Key Environmental Design Features of the Project	1-7
1.6.1	Water Management	1-7
1.6.2	Rejects Management	1-8
1.6.3	Sewage Treatment Plant	1-8
1.6.4	Fuel, Lubricant and Oil Storage	1-9
1.6.5	Washdown Facilities	1-9
1.6.6	Rehabilitation	1-9
1.7	Project Footprint	1-11
1.8	Objectives of the Environmental Impact Statement	1-12
1.9	Structure of the EIS	1-13
1.10	Methodology of the Environmental Impact Statement	1-15
1.11	Assessing Significance of Impacts	1-16
1.12	The EIS Process	1-17
1.13	Public Consultation	1-21
2.	Project Rationale and Alternatives	2-1
2.1	Project Rationale	2-1
2.1.1	The International Market for Coal	2-1
2.1.2	Economic Benefits	2-3
2.1.3	Social Benefits	2-4
2.2	Alternatives to the Project	2-5
2.2.1	Do Nothing	2-5
2.2.2	Mining Methodology	2-5
2.2.3	Mining Schedule	2-5
2.2.5	Waste Rock and Coal Removal	2-8
2.2.6	Location and Design of Out of Pit Waste Rock Dumps	2-8
2.2.7	Final Voids	2-9
2.2.8	Location of Water Management and Mine Infrastructure	2-10
2.2.9	ROM Coal Handling Alternatives	2-10
2.2.10	Alternatives Considered For Coal Preparation	2-11
2.2.11	Rejects	2-11
2.2.12	Product Coal Transport and Train Loading Facility Options	2-12
2.2.13	Product Coal Transportation	2-12
2.2.14	General Waste Disposal	2-12
2.2.15	Roads	2-13
2.2.16	Operations Workforce Transport	2-13

2.2.17	Water Management	2-13
2.2.18	Raw Water Supply	2-14
2.2.19	Potable Water	2-14
2.2.20	Power Supply	2-14
2.2.21	Telecommunications.....	2-14
2.2.22	Accommodation	2-15
2.3	Relationship to Other Projects	2-15
2.4	Co-location Opportunities.....	2-16
3.	Project Approvals.....	3-1
3.1	Overview of EIS Process and Project Approvals	3-1
3.2	Scope of Activities for which Approval is Being Sought.....	3-2
3.2.1	Proponent Activities for which a Separate Approval will be Sought	3-2
3.2.2	Interrelated projects	3-3
3.3	Primary Statutory Approvals.....	3-4
3.3.1	Environment Protection and Biodiversity Conservation Act 1999	3-4
3.3.2	State Development and Public Works Organisation Act 1971	3-5
3.3.3	Environmental Protection Act 1994	3-5
3.3.4	Mineral Resources Act 1989.....	3-8
3.4	Additional Statutory Approvals.....	3-8
3.4.1	Aboriginal and Torres Strait Islander Heritage Protection Act 1984	3-8
3.4.2	Aboriginal Cultural Heritage Act 2003	3-9
3.4.3	Building Act 1975.....	3-9
3.4.4	Building and Construction Industry (Portable Long Service Leave) Act 2002	3-10
3.4.5	Coal Mining Safety and Health Act 1999.....	3-10
3.4.6	Coastal Protection and Management Act 1995	3-10
3.4.7	Coroners Act 2003	3-10
3.4.8	Criminal Code Act 1899.....	3-11
3.4.9	Customs Act 1901	3-11
3.4.10	Dangerous Goods Safety Management Act 2001.....	3-11
3.4.11	Electricity Act 1994	3-11
3.4.12	Energy Efficiency Opportunities Act 2006.....	3-11
3.4.13	Environmental Protection (Sea Dumping) Act 1981	3-11
3.4.14	Explosives Act 1999	3-12
3.4.15	Fisheries Act 1994.....	3-12
3.4.16	Food Act 2006.....	3-12
3.4.17	Foreign Acquisitions and Takeovers Act 1975.....	3-12
3.4.18	Great Barrier Reef Marine Park Act 1975	3-12
3.4.19	Greenhouse Gas Storage Act 2009	3-12
3.4.20	Land Act 1994	3-13
3.4.21	Land Protection (Pests and Stock Route Management) Act 2002.....	3-13
3.4.22	Local Government Act 1993	3-14
3.4.23	Maritime Safety Queensland Act 2002	3-14
3.4.24	Mining and Quarrying Safety and Health Act 1999	3-14
3.4.25	National Greenhouse and Energy Report Act 2007	3-14
3.4.26	Native Title Act 1993.....	3-14
3.4.27	Native Title (Queensland) Act 1993	3-14
3.4.28	Nature Conservation Act 1992	3-14
3.4.29	Queensland Heritage Act 1992.....	3-15
3.4.30	Soil Conservation Act 1986	3-16

3.4.31	Strategic Cropping Land Act 2011	3-16
3.4.32	Survey and Mapping Infrastructure Act 2003	3-16
3.4.33	Sustainable Planning Act 2009	3-17
3.4.34	Transport Infrastructure Act 1994	3-17
3.4.35	Transport Operations (Marine Pollution) Act 1995	3-18
3.4.36	Transport Operations (Marine Safety) Act 1994	3-18
3.4.37	Transport Operations (Road Use Management) Act 1995.....	3-18
3.4.38	Transport Planning and Coordination Act 1994	3-18
3.4.39	Vegetation Management Act 1999.....	3-18
3.4.40	Water Act 2000.....	3-19
3.4.41	Water Supply (Safety and Reliability) Act 2008.....	3-19
3.4.42	Work Health and Safety Act 2011.....	3-19
3.5	Commonwealth Obligations.....	3-19
3.5.1	World Heritage Values	3-19
3.5.2	Migratory Animals	3-20
3.5.3	Biodiversity.....	3-20
3.5.4	Climate	3-20
3.5.5	Wetlands of International Importance	3-21
3.6	Government Policies, Planning Processes and Standards.....	3-21
3.6.1	Overview	3-21
3.6.2	State Planning Policies	3-21
3.6.3	Environmental Protection Policies (EPPs)	3-24
3.6.4	Water Resource Plans	3-25
3.6.5	EPBC Act Environmental Offsets Policy.....	3-26
3.6.6	Queensland Government Environmental Offsets Policy	3-26
3.6.7	Regional Plans.....	3-27
3.6.8	Regional Natural Resource Management (NRM) Plans	3-28
3.6.9	Local Planning Processes.....	3-29
3.6.10	Standards, Codes and Guidelines	3-29
3.6.11	Guidelines for Environmental Management.....	3-29
4.	Public Consultation	4-1
4.1	Introduction	4-1
4.1.1	Project Proponent.....	4-1
4.2	Statutory Consultation Requirements.....	4-1
4.2.1	<i>State Development and Public Works Organisation Act 1971</i>	4-1
4.2.2	<i>Environmental Protection Act 1994 and Mineral Resources Act 1989</i>	4-2
4.2.3	<i>Environment Protection and Biodiversity Conservation Act 1999</i>	4-3
4.3	Stakeholder Identification.....	4-4
4.4	Consultation Strategy.....	4-7
4.4.1	Consultation Objectives	4-7
4.4.2	Phase 1: Exploration (2010 - Ongoing)	4-10
4.4.3	Phase 2: EIS and Approvals (Late 2010 to Approvals).....	4-10
4.4.4	Phase 3: Construction 2014 and Phase 4: Operations 2015+	4-11
4.5	Stakeholder Engagement and Community Consultation	4-11
4.5.1	Stakeholder and Community Briefings	4-13
4.5.2	Government Stakeholder Briefings	4-13
4.5.3	Landowners and Residents	4-14
4.5.4	Indigenous Groups.....	4-14
4.5.5	Glenden Stakeholder Engagement Group (SEG)	4-14

4.6	Key Stakeholder and Community Consultation Findings	4-14
4.7	Integration of Findings into the EIS	4-25
4.8	Ongoing Consultation Process	4-25
4.9	Dispute Resolution	4-28
4.9.1	Objectives of the Dispute Resolution Process	4-28
4.9.2	The Dispute Resolution Process	4-28
4.10	Conclusion.....	4-29
5.	Project Location	5-1
5.1	Introduction	5-1
5.2	State Context	5-1
5.3	Regional Context.....	5-3
5.3.1	Regional Location, Key Regional Projects and Infrastructure	5-3
5.3.2	Regional Council Areas.....	5-6
5.3.3	Regional Centres.....	5-6
5.4	Local Context.....	5-6
5.4.1	Mining Tenures.....	5-6
5.4.2	Project Area Boundary	5-6
5.4.3	Overlapping Tenure	5-7
5.4.4	Real Property Tenures	5-7
5.5	Project Area Layout and Third Party Infrastructure.....	5-15
5.5.1	Mine Phases, Areas, Zones and Pit Locations	5-15
5.5.2	Buffers.....	5-16
5.5.3	Off Tenement Infrastructure	5-23
5.5.4	Third Party Infrastructure, Rail and Roads	5-23
5.5.5	Natural Features	5-23
6.	Construction	6-1
6.1	Overview	6-1
6.2	Construction Program	6-1
6.2.1	Project Phases	6-1
6.2.2	Estimated Timing of Construction Activities	6-4
6.3	Pre-construction.....	6-4
6.4	Site preparation	6-4
6.4.1	South Phase.....	6-4
6.4.2	North Phase.....	6-5
6.5	Construction of Key Infrastructure Components.....	6-5
6.5.1	South Phase	6-6
6.5.2	North Phase	6-6
6.5.3	Civil Works.....	6-7
6.5.4	Structure and Plant Erection and Installation	6-8
6.5.5	Construction Management Facilities	6-8
6.5.6	Dragline	6-9
6.5.7	Coal Handling and Preparation Plants	6-9
6.5.8	Train Loading Facilities.....	6-9
6.5.9	Infrastructure Corridors	6-9
6.5.10	Water Requirements.....	6-11
6.5.11	Water Supply Infrastructure.....	6-11
6.5.12	Water and Rejects Management Infrastructure	6-12
6.5.13	Watercourses	6-12

6.5.14	Air Supply	6-13
6.5.15	Power Supply Infrastructure	6-13
6.5.16	Telecommunications.....	6-13
6.5.17	Commissioning and Testing.....	6-13
6.5.18	Site Demobilisation.....	6-13
6.6	Construction Workforce	6-13
6.6.1	Construction Workforce Accommodation	6-14
6.6.2	Construction of Accommodation for the Operational Workforce	6-14
6.6.3	Transportation of Construction Personnel.....	6-16
6.6.4	Potable Water Supply and Sewage Management	6-16
6.7	Materials, Plant and Equipment Sourcing and Transportation.....	6-16
6.7.1	Construction Materials	6-17
6.7.2	Hazardous Materials.....	6-17
6.7.3	Timber Resources	6-17
6.8	Waste Management.....	6-17
6.9	Site Management and Security	6-18
7.	Operation.....	7-1
7.1	Introduction	7-1
7.2	Tenements	7-1
7.2.1	QCoal’s and Byerwen Coal’s Tenements.....	7-1
7.3	Resource Base and Mine Life.....	7-4
7.3.1	Ongoing Evaluation and Exploration Activities	7-5
7.3.2	Gas in the Coal Seams.....	7-5
7.3.3	Sterilisation of Resources	7-5
7.4	Mine Sequencing, Methods and Equipment	7-5
7.4.1	Mine Planning.....	7-5
7.4.2	Overview	7-5
7.4.3	Scheduling.....	7-8
7.4.4	Open Cut Mining.....	7-8
7.4.5	Open Cut Mining Equipment.....	7-9
7.4.6	Waste Rock and ROM Coal Production.....	7-10
7.4.7	ROM Coal Handling.....	7-11
7.5	Mine Site Layout and Project Footprint over the Mine Life.....	7-12
7.6	Processing and Products	7-23
7.6.1	Coal Handling and Processing Plants	7-24
7.7	Rejects Handling and Disposal.....	7-26
7.7.1	Disposal Alternatives	7-26
7.7.2	Option 1 - Trucking of Coarse Rejects and Co-disposal of Fine and Mid-size Rejects.....	7-27
7.7.3	Option 2 - Trucking Rejects and Filter Pressed Fine Rejects	7-27
7.7.4	Comparative Assessment of Disposal Methods	7-27
7.7.5	Co-disposal System.....	7-27
7.7.6	Rejects Disposal.....	7-28
7.7.7	Co-Disposal Dams	7-28
7.8	Product Coal Handling.....	7-29
7.8.1	Product Coal Transport to Train Loading Facilities	7-31
7.8.2	Train Loading Facilities.....	7-31
7.8.3	Rail Line to Abbot Point.....	7-31
7.9	Mine Infrastructure Area Requirements	7-32

7.9.1	Administration Facility	7-35
7.9.2	Workshop and Store	7-35
7.9.3	Fuel Facility.....	7-35
7.9.4	Lube and Oil Facility.....	7-36
7.9.5	Washdown Facilities	7-36
7.9.6	Reticulated Services.....	7-36
7.9.7	Explosives Magazine and Storage.....	7-37
7.10	Infrastructure Corridors	7-37
7.11	Road Transport	7-38
7.11.1	ROM Coal and Waste Rock Haul Roads	7-39
7.11.2	Site Access and Internal Roads	7-39
7.11.3	Public Access Roads to the Mine Site	7-39
7.11.4	Public Road Closures and Relocations	7-39
7.12	Forestry Products and Quarry Material.....	7-42
7.13	Energy	7-42
7.13.1	Power Demand.....	7-42
7.13.2	Power Supply Options.....	7-42
7.13.3	Existing Power Infrastructure Relocations	7-42
7.14	Telecommunications	7-43
7.15	Water Management.....	7-43
7.16	Workforce	7-43
7.17	Workforce Accommodation	7-45
7.18	Waste Management.....	7-46
7.18.1	Excavated Waste and Coal Rejects	7-46
7.18.2	Solid and Liquid Waste.....	7-46
7.18.3	Sewerage System.....	7-47
7.19	Rehabilitation and Decommissioning.....	7-47
8.	Water Management.....	8-1
8.1	Introduction	8-1
8.2	Water Management System	8-1
8.2.1	Mine Affected Water	8-2
8.2.2	Sediment Affected Water	8-2
8.2.3	Clean Water.....	8-2
8.2.4	Drainage Diversions	8-2
8.3	Process Water, Water Demand and Water Supply.....	8-5
8.3.1	Potable Water	8-6
8.3.2	Water Conservation Measures.....	8-7
8.4	Mine Water Balance Model	8-7
8.4.1	Water Volume	8-7
8.4.2	Water Quality	8-10
8.5	Release Strategy.....	8-11
8.5.1	Derivation of Release Rules.....	8-14
8.5.2	Proposed Release Rules	8-15
8.6	Water Management Infrastructure	8-16
8.6.1	Overview	8-16
8.6.2	Description of Infrastructure Staging.....	8-17
8.6.3	Dam Design and Sizing	8-29
8.6.4	Dam Hazard Assessment.....	8-31
8.7	Unplanned Releases and Contingency Measures	8-34

9.	Waste Rock and Rejects	9-1
9.1	Introduction	9-1
9.2	Description of Coal, Waste Rock and Coal Rejects.....	9-1
9.2.1	Coal	9-1
9.2.2	Waste Rock.....	9-2
9.2.3	Coal Reject Materials.....	9-3
9.3	Waste Rock and Coal Rejects Geochemical Assessment Methodology	9-3
9.4	Waste Rock Characterisation	9-6
9.4.1	Electrical Conductivity and pH.....	9-6
9.4.2	Acidity	9-7
9.4.3	Sodicity.....	9-9
9.4.4	Metals	9-9
9.5	Coal Rejects Characterisation	9-9
9.5.1	Electrical Conductivity and pH.....	9-9
9.5.2	Acidity	9-10
9.5.3	Metals	9-12
9.6	Waste Materials Handling and Management.....	9-12
9.6.1	Waste Rock Dumps	9-12
9.6.2	Mine Waste Management Plan.....	9-12
9.6.3	Waste Rock Disposal Method and Dump Design	9-13
9.7	Rejects Disposal Method and Containment Design.....	9-14
9.7.1	Co-disposal Dams.....	9-14
9.8	Conclusion.....	9-15
10.	Decommissioning and Rehabilitation	10-1
10.1	Rehabilitation Hierarchy and Goals.....	10-1
10.2	Decommissioning and Rehabilitation Objectives	10-1
10.3	Land Use.....	10-2
10.3.1	Pre Mine Land Use and Land Suitability.....	10-2
10.3.2	Potential Post-mine Land Uses.....	10-2
10.4	Progressive Rehabilitation	10-5
10.5	Rehabilitation and Decommissioning by Mine Domain.....	10-12
10.5.1	Waste Rock Dumps	10-12
10.5.2	Final Voids	10-13
10.5.3	Mine Infrastructure Areas and CHPPs	10-15
10.5.4	Co-disposal Dams.....	10-16
10.5.5	Mine Water Management Infrastructure	10-17
10.5.6	Drainage Diversions	10-17
10.5.7	Haul Roads and Access Roads	10-18
10.5.8	Train Loading Facilities.....	10-18
10.5.9	Linear Infrastructure	10-19
10.6	Rehabilitation Management and Monitoring.....	10-19
10.6.1	Soils Management	10-19
10.6.2	Erosion Control in Rehabilitation Areas.....	10-20
10.6.3	Vegetation Cover Management	10-20
10.6.4	Monitoring and Review.....	10-21
10.7	Completion Criteria and Indicators	10-22
10.8	Mine Closure Planning	10-23
10.8.1	Stakeholders.....	10-24
10.8.2	Closure Planning.....	10-24

10.8.3	Implementation	10-24
10.8.4	Standards and Completion Criteria	10-24
10.8.5	Relinquishment.....	10-25
11.	Final Voids.....	11-1
11.1	Introduction	11-1
11.1.1	Final Void Extent and Location	11-1
11.2	Final Void Design Strategies	11-3
11.2.1	Final Void End Use	11-3
11.2.2	Final Void Design	11-3
11.3	Hydrology of Final Voids	11-4
11.3.1	Surface Water Hydrology	11-4
11.3.2	Groundwater Hydrology	11-5
11.4	Water Level and Quality Assessment Methodology.....	11-5
11.5	Void Water Level.....	11-6
11.5.1	Modelling Methodology.....	11-6
11.5.2	Assessment of Void Water Level	11-6
11.5.3	Extreme Event Impacts	11-12
11.6	Void Water Quality	11-13
11.6.1	Physical Factors Affecting Pit Lakes	11-13
11.6.2	Source Water Quality.....	11-14
11.6.3	Final Void Water Salinity Prediction	11-15
11.6.4	Stratification and Mixing.....	11-17
11.6.5	Biological Succession	11-18
11.6.6	Trace Metals and Geochemical Behaviour.....	11-18
11.6.7	Other Water Quality Considerations	11-19
11.6.8	Limnology Changes During Pit Lake Evolution	11-19
11.7	Final Void Rehabilitation.....	11-19
11.8	Conclusion.....	11-20
12.	Climate and Climate Change	12-1
12.1	Introduction	12-1
12.2	Climate	12-1
12.2.1	Regional Climate Patterns.....	12-1
12.2.2	Temperature.....	12-1
12.2.3	Rainfall	12-2
12.2.4	Humidity.....	12-4
12.2.5	Wind.....	12-5
12.3	Extremes of Climate	12-6
12.3.1	Temperature Extremes	12-6
12.3.2	Droughts.....	12-6
12.3.3	Floods.....	12-7
12.3.4	Extreme Winds and Tropical Cyclones.....	12-8
12.3.5	Bushfire Risk.....	12-9
12.3.6	Risk Assessment of Extremes of Climate	12-9
12.4	Climate Change	12-14
12.4.1	Climate Change Data and Scenarios	12-14
12.4.2	Temperature Changes.....	12-14
12.4.3	Rainfall Changes	12-16
12.4.4	Changes in Drought Patterns.....	12-19

12.4.5	Wind Speed Changes	12-19
12.4.6	Changes in Storm and Cyclone Patterns	12-21
12.4.7	Sea Level Change	12-22
12.5	Impact of Climate Change on the Project	12-23
12.5.1	Temperature Change	12-23
12.5.2	Rainfall Change	12-23
12.5.3	Changes in Drought Patterns.....	12-24
12.5.4	Wind Speed Changes	12-24
12.5.5	Changes in Storm and Cyclone Patterns	12-24
12.6	Adaptation Strategies and Mitigation Measures for Climate Change	
	Impacts	12-24
12.6.1	Temperature Change	12-24
12.6.2	Rainfall Change.....	12-25
12.6.3	Changes in Drought Patterns.....	12-27
12.6.4	Wind Speed Changes	12-28
12.6.5	Changes in Storm and Cyclone Patterns	12-28
12.7	Commitments on Managing Climate Change	12-29
12.8	Conclusion.....	12-30
12.8.1	Climate	12-30
12.8.2	Climate Change.....	12-30
13.	Geology, Topography and Soils.....	13-1
13.1	Introduction	13-1
13.2	Topography	13-1
13.3	Geology	13-3
13.3.1	Geology of the Project Area	13-3
13.3.2	Stratigraphy	13-5
13.3.3	Geological Structure	13-5
13.3.4	Presence of Fossils.....	13-9
13.4	Mineral Resources.....	13-9
13.4.1	Resource Classification	13-9
13.4.2	Resource Estimation	13-9
13.4.3	Resource Utilisation.....	13-10
13.4.4	Byerwen Coal Project Area.....	13-10
13.5	Soils.....	13-11
13.5.1	Survey Methodology.....	13-11
13.5.2	Soil Types.....	13-11
13.5.3	Summary of Soil Properties and Management Issues	13-12
13.5.4	Soil Stability and Suitability for Construction of Project Facilities.....	13-16
13.6	Potential Impacts and Mitigation Measures	13-16
13.6.1	Land Disturbance	13-16
13.6.2	Topography	13-18
13.6.3	Soil Quality	13-18
13.6.4	Erosion and Stability	13-23
13.6.5	Local Waterways.....	13-26
13.7	Conclusion.....	13-27
14.	Land Use, Tenure and Contamination	14-1
14.1	Introduction	14-1
14.2	Regional Land Use and Character	14-1

14.2.1	Regional Context and Regional Councils.....	14-1
14.2.2	Regional Plan Area.....	14-3
14.2.3	Natural Resource Management Areas.....	14-4
14.3	Land Tenure and Use.....	14-4
14.3.1	Mining Tenements.....	14-4
14.3.2	Property Tenures in the Project Area.....	14-5
14.3.3	Existing Dwellings.....	14-9
14.3.4	Land Zoning.....	14-9
