Volume 1 EIS

Executive Summary	1
Introduction	1
Legal Framework	2
Title of the Project	2
Name and Address of Proponent	3
Need for the Project	3
The Proposed Development	4
Project Program	5
Project Delivery	5
Alternative Options Considered	5
EIS Findings	6
Conclusion	8
1. Introduction	1.1
1.1 The Proponent	1.3
1.2 Terms of Reference and Purpose of the EIS	1.4
1.3 The Study Team	1.5
1.4 Summary of Environmental Legislative Requirements	1.6
1.5 The Public Consultation Process	1.9
2. Background and Project Rationale	2.1
2.1 Overview of Existing Transport Infrastructure	2.1
2.1.1 Existing Road Network	2.1
2.1.2 Existing Public Transport Network	2.2
2.1.3 River Users	2.3
2.2 Existing Gateway Bridge	2.3
2.3 Regional Planning Context	2.3
2.3.1 Population Growth	2.3
2.3.2 Economic Activity	2.4
2.3.3 Industry Competitiveness	2.5
2.3.4 Strategic Planning Response	2.5
2.4 Need for the Project	2.6
2.4.1 Objectives of the Project	2.6
2.4.2 Existing Traffic Congestion and Network Deficiencies	2.7
2.4.3 Future Traffic Forecasts	2.9
2.4.4 Strategic Importance of the Corridor	2.10
2.4.5 Emerging Constraints	2.12
2.4.6 Consequences of Not Undertaking the GUP	2.13
2.4.7 Conclusion	2.13

2.5	Options Analysis	2.13
2.5.1	Overview of Key Planning Studies	2.15
2.5.2	Planning Study Analysis and Outcomes	2.16
2.5.3	Tidal Flow on Gateway Bridge or Peak Spreading	2.19
2.5.4	Full Electronic Tolling	2.19
2.5.5	No Gateway Upgrade Project	2.19
2.5.6	Public Private Partnership Option	2.20
2.6	Costs and Benefits	2.20
2.6.1	Project Costs	2.20
2.6.2	Economic Benefits	2.21
3.	Project Description	3.1
3.1	Description of GUP	3.1
3.2	Major Features of the GUP	3.2
3.2.1	Mt Gravatt – Capalaba Road to Cleveland Branch Rail Line	3.2
3.2.2	Cleveland Branch Rail Line to Pinkenba Rail Line	3.2
3.2.3	Existing Gateway Motorway – Bridge to Kingsford Smith Drive	3.4
3.2.4	Pinkenba Rail Line to Nudgee Road	3.4
3.3	Project Program	3.5
3.3.1	Project Delivery	3.5
3.3.2	GUP Design Life	3.6
3.3.3	Operational Life	3.6
3.4	Preferred GUP Motorway Alignment	3.6
3.4.1	Interchanges	3.6
3.4.2	On and Off Ramps	3.6
3.4.3	Embankments	3.7
3.4.4	Toll Facilities	3.7
3.5	Design Parameters	3.8
3.5.1	Horizontal and Vertical Alignment	3.8
3.5.2	Design Speed	3.8
3.5.3	Typical Cross Section	3.9
3.5.4	Right of Way	3.9
3.5.5	Pavements	3.9
3.5.6	Structures	3.10
3.5.7	Predicted Traffic Volumes	3.11
3.5.8	Design Aspects to be Resolved	3.11
3.6	Description of Major Structures	3.12
3.6.1	Mt Gravatt-Capalaba Road to Cleveland Branch Rail Line	3.12
3.6.2	Cleveland Branch Rail Line – Pinkenba Rail Line	3.14
3.6.3	Pinkenba Rail Line to Nudgee Road	3.18
3.7	Drainage	3.19
3.7.1	Bulimba Creek	3.21
3.7.2	Brisbane River	3.21
3.7.3	Kedron Brook Floodway	3.21
3.7.4	Other Drainage	3.22
3.8	Operating Features	3.23
3.8.1	Traffic Management	3.23
3.8.2	Emergency Services Vehicles	3.24

3.8.3	Vehicle Breakdown/Crashes	3.24
3.8.4	Hazardous Goods	3.24
3.8.5	Maintenance Minimisation	3.25
3.8.6	Over Height Vehicles	3.25
3.8.7	Lighting	3.25
3.8.8	Signage	3.25
3.9	Construction	3.26
3.10	Construction and Operational Transport Requirements	3.26
3.10.1	Type and Volume of Construction Vehicles	3.26
3.10.2	Type and Volume of Operational Vehicles	3.27
3.10.3	Quantities of Materials within the GUP	3.27
3.10.4	Origin of Materials	3.27
3.10.5	Transport Routes Likely to be Used During Construction	3.28
3.10.6	Impacts on the Existing Road Network	3.28
3.10.7	Hazardous Goods	3.28
3.10.8	Access Requirements	3.28
3.10.9	Construction Laydown Areas	3.29
3.11	Workforce and Other Infrastructure	3.30
3.12	Waste Management	3.30
3.12.1	Potential Waste Generation	3.31
3.12.2	Legislative Requirements	3.33
3.12.3	Waste Minimisation Strategies	3.33
3.13	Permits, Licences and Environmental Authorities	3.34
3.14	Rehabilitation of Construction Site	3.34
4.	Land Use	4.1
4.1	Introduction	4.1
4.2	Methodology	4.2
4.2.1	Existing Land Use	4.2
4.2.2	Existing Tenure	4.2
4.2.3	Future Land Use	4.2
4.2.4	Statutory Land Use Controls	4.3
4.2.5	Potential Impacts	4.3
4.3	Statutory Land Use Controls over the Project Corridor	4.4
4.4	Mt Gravatt–Capalaba Road to Cleveland Branch Rail Line (Southern Section)	4.4
4.4.1	Existing Land Uses	4.5
4.4.2	Future Land Uses	4.6
4.4.3	Existing Land Tenure	4.7
4.4.4	Statutory Land Use Controls	4.7
4.4.5	Potential Impacts	4.8
4.4.6	Mitigation Measures	4.11
4.5	Cleveland Branch Rail Line to Pinkenba Rail Line (Bridge Section)	4.11
4.5.1	Existing Land Uses	4.11
	Curtin Avenue to Pinkenba Rail Line (Existing Gateway Section)	4.12
4.5.2	Future Land Uses	4.12
4.5.3	Existing Land Tenure	4.14
4.5.4	Statutory Land Use Controls	4.14

4.5.5	<i>Potential Impacts</i>	4.15
4.5.6	<i>Mitigation Measures</i>	4.17
4.6	Pinkenba Rail Line to Nudgee Road (Northern Section)	4.18
4.6.1	<i>Existing Land Uses</i>	4.18
	Pinkenba Rail Line to Gateway Motorway	4.18
	Northern Bifurcation to Nudgee Road	4.18
4.6.2	<i>Future Land Uses</i>	4.18
4.6.3	<i>Existing Land Tenure (Northern Section)</i>	4.22
4.6.4	<i>Statutory Land Use Controls</i>	4.22
4.6.5	<i>Potential Impacts</i>	4.26
4.6.6	<i>Mitigation Measures</i>	4.29
4.7	Conclusion	4.29
5.	Transportation	5.1
5.1	Introduction	5.1
5.2	Background	5.1
5.3	Existing Transport Network	5.1
5.3.1	<i>The Study Area</i>	5.1
5.3.2	<i>The Road Network</i>	5.2
5.3.3	<i>The Transport Task</i>	5.4
5.3.4	<i>Road Traffic Movement Patterns</i>	5.4
5.3.5	<i>Traffic Flows</i>	5.4
5.3.6	<i>Tolling</i>	5.12
5.3.7	<i>Public Transport Services</i>	5.13
5.3.8	<i>Pedestrian and Cycle Facilities</i>	5.14
5.4	Road Network Performance	5.14
5.4.1	<i>Through Traffic Demand</i>	5.14
5.4.2	<i>Travel Speeds and Travel Times</i>	5.15
5.4.3	<i>Intersection Operation</i>	5.15
5.4.4	<i>Interaction with Public Transport Facilities</i>	5.17
5.4.5	<i>Accident History and Road Safety</i>	5.17
5.5	Traffic Forecasting Methodology	5.20
5.5.1	<i>Land Use and Trip Patterns</i>	5.20
5.5.2	<i>Overview of the Traffic Modelling Process</i>	5.24
5.5.3	<i>Provision of Future Traffic Forecasts</i>	5.27
5.5.4	<i>Road Network Improvements for Modelling Purposes</i>	5.28
5.5.5	<i>Modelling of Alternative Future Scenarios</i>	5.28
5.5.6	<i>Induced and Suppressed Traffic</i>	5.32
5.6	Future Base Traffic Conditions	5.35
5.6.1	<i>Future Base Traffic Patterns</i>	5.35
5.6.2	<i>Future Base Traffic Patterns in 2021</i>	5.37
5.6.3	<i>Effects on Road Network Performance</i>	5.37
5.6.4	<i>Intersection Performance</i>	5.38
5.6.5	<i>Public Transport Services</i>	5.38
5.6.6	<i>Road Safety Assessment</i>	5.40
5.6.7	<i>Summary</i>	5.41
5.7	Potential Impacts and Mitigation Measures	5.42
5.7.1	<i>Traffic Volumes</i>	5.42

5.7.2	Traffic Flows at Screenlines	5.43
5.7.3	Traffic Volumes on the Local Road Network	5.44
5.7.4	Regional Route Traffic Implications	5.44
5.7.5	Intersection Performance	5.45
5.7.6	Travel Times	5.46
5.7.7	Heavy Commercial Vehicle Movements	5.47
5.7.8	Aggregate Road Network Performance	5.47
5.7.9	Public Transport Network Impacts	5.49
5.7.10	Pedestrian and Cycle Network Impacts	5.49
5.7.11	Road Safety and Accidents	5.50
5.7.12	Sensitivity of GUP tolls	5.51
5.7.13	Summary of Impacts of GUP	5.52
5.8	Conclusions	5.53
5.8.1	The Transport Task	5.53
5.8.2	Existing Traffic Conditions	5.53
5.8.3	Future Conditions in Absence of Action	5.53
5.8.4	Impacts of the GUP	5.54
6.	Pedestrian and Cycling	6.1
6.1	Description of Existing Environment	6.1
6.1.1	Existing Corridors Crossing the Gateway Motorway	6.1
6.1.2	Existing Corridors Adjacent to the Gateway Motorway	6.2
6.2	Potential Impacts and Mitigation Measures	6.3
6.2.1	Strategic Planning	6.3
6.2.2	Planned Networks	6.3
6.2.3	Impacts on Existing Networks	6.4
6.2.4	Impacts on Planned Networks	6.5
6.2.5	Network Opportunities - Gateway Bridge Crossing	6.6
6.3	Conclusion	6.8
7.	Utility Services	7.1
7.1	Introduction	7.1
7.2	Methodology	7.1
7.3	Summary of Existing Utility Services	7.1
7.4	Potential Impacts and Mitigation Measures	7.1
7.4.1	Electrical	7.2
7.4.2	Oil and Gas	7.3
7.4.3	Telecommunications	7.4
7.4.4	Sewerage	7.4
7.4.5	Stormwater	7.5
7.4.6	Water Supply	7.5
7.4.7	Airport Infrastructure	7.5
7.5	Future Utility Services	7.5
7.6	Conclusions	7.6
8.	Regulatory Framework and Planning	8.1
8.1	Introduction	8.1

8.2	Commonwealth Regulatory Framework	8.1
8.2.1	<i>Airports Act 1996 (Cth)</i>	8.1
8.2.2	<i>Environment Protection and Biodiversity Conservation Act 1999 (Cth)</i>	8.3
8.3	State EIS Regulatory Framework	8.4
8.4	State Permits, Licenses and Environmental Authorities	8.4
8.5	Relevant International Conventions	8.6
8.6	International Conventions that Drive Australian Government Policies	8.7
8.7	Relevant State Legislation and Policies	8.7
9.	<i>Topography/Geomorphology/Geology</i>	9.1
9.1	Introduction	9.1
9.2	Methodology	9.1
9.3	Description of the Existing Environment	9.1
9.3.1	<i>Mt Gravatt – Capalaba Road to Cleveland Branch Rail Line</i>	9.1
9.3.2	<i>Cleveland Branch Rail Line to Pinkenba Rail Line</i>	9.4
9.3.3	<i>Pinkenba Rail Line to Nudgee Road</i>	9.5
9.4	Potential Impacts	9.7
9.4.1	<i>Mt Gravatt – Capalaba Road to Cleveland Branch Rail Line</i>	9.7
9.4.2	<i>Cleveland Branch Rail Line to Pinkenba Rail Line</i>	9.8
9.4.3	<i>Pinkenba Rail Line to Nudgee Road</i>	9.8
9.4.4	<i>Summary of Impacts along Route</i>	9.8
9.5	Mitigation Measures	9.8
9.5.1	<i>Design</i>	9.8
9.5.2	<i>Construction</i>	9.9
9.5.3	<i>Operation</i>	9.9
9.6	Conclusions	9.9
10.	<i>Soils</i>	10.1
10.1	Introduction	10.1
10.2	General Soils Description	10.2
10.2.1	<i>Overview</i>	10.2
10.2.2	<i>Methodology</i>	10.3
10.2.3	<i>Potential Impacts Overview</i>	10.5
10.2.4	<i>Mt Gravatt – Capalaba Road to Cleveland Branch Rail Line</i>	10.8
10.2.5	<i>Cleveland Branch Rail Line to Pinkenba Rail Line</i>	10.10
10.2.6	<i>Pinkenba Rail Line to Nudgee Road</i>	10.13
10.2.7	<i>Mitigation Measures</i>	10.15
10.3	Acid Sulphate Soils	10.22
10.3.1	<i>Overview</i>	10.22
10.3.2	<i>Methodology</i>	10.23
10.3.3	<i>Potential Impacts Overview</i>	10.23
10.3.4	<i>Mt Gravatt – Capalaba Road to Cleveland Branch Rail Line</i>	10.25
10.3.5	<i>Cleveland Branch Rail Line to Pinkenba Rail Line</i>	10.26
10.3.6	<i>Pinkenba Rail Line to Nudgee Road</i>	10.28
10.3.7	<i>Mitigation Measures</i>	10.30

10.4	Contaminated Land	10.32
10.4.1	Overview	10.32
10.4.2	Methodology	10.33
10.4.3	Potential Impacts Overview	10.34
10.4.4	Limitations of the Study	10.34
10.4.5	Mt Gravatt-Capalaba Road to Cleveland Branch Rail Line	10.34
10.4.6	Cleveland Branch Rail Line to Pinkenba Rail Line	10.36
10.4.7	Pinkenba Rail Line to Nudgee Road	10.40
10.4.8	Mitigation Measures	10.44
10.5	Conclusions	10.47
10.5.1	Soil and Soil Stability	10.47
10.5.2	Acid Sulphate Soils	10.47
10.5.3	Contaminated Land	10.47
11.	Hydrology/Hydraulics	11.1
11.1	Introduction	11.1
11.2	Methodology	11.1
11.3	Mt Gravatt–Capalaba Road to Cleveland Branch Rail Line	11.2
11.3.1	Existing Environment	11.2
11.3.2	Potential Impacts	11.3
11.3.3	Mitigation Options	11.3
11.4	Cleveland Branch Rail Line to Pinkenba Rail Line	11.4
11.5	Pinkenba Rail Line to Nudgee Road	11.4
11.5.1	Existing Environment	11.4
11.5.2	Potential Impacts	11.5
11.5.3	Mitigation Options	11.5
11.6	Potential Impact of Climate Change	11.6
11.7	Conclusions	11.6
12.	Surface Water Quality	12.1
12.1	Introduction	12.1
12.2	Methodology	12.2
12.2.1	General Methodology	12.2
12.2.2	Water Quality Sampling	12.2
12.3	Background	12.3
12.4	Regulatory Framework	12.3
12.4.1	Environmental Protection (Water) Policy 1997	12.3
12.4.2	Airports (Environment Protection) Regulations 1997	12.4
12.4.3	Water Quality Guidelines	12.4
12.5	Downstream Waterway Values	12.5
12.6	Mt Gravatt-Capalaba Road to Cleveland Branch Rail Line	12.5
12.6.1	Background	12.5
12.6.2	Existing Environment	12.6
12.6.3	Potential Impacts	12.8
12.7	Cleveland Branch Rail Line to Pinkenba Rail Line	12.11

12.7.1	<i>Background</i>	12.11
12.7.2	<i>Existing Environment</i>	12.11
12.7.3	<i>Potential Impacts</i>	12.12
12.8	Pinkenba Rail Line to Nudgee Road	12.14
12.8.1	<i>Background</i>	12.14
12.8.2	<i>Existing Environment</i>	12.14
12.8.3	<i>Potential Impacts</i>	12.17
12.9	Summary of Impacts	12.18
12.10	Mitigation Measures	12.19
12.10.1	<i>Design</i>	12.19
12.10.2	<i>Construction</i>	12.21
12.10.3	<i>Operation</i>	12.23
12.10.4	<i>Water Quality Monitoring</i>	12.23
12.11	Conclusions and Recommendations	12.25
13.	Groundwater	13.1
13.1	Introduction	13.1
13.2	Methodology	13.1
13.3	Geological Background	13.2
13.4	Hydrogeological Setting	13.2
13.4.1	<i>General</i>	13.2
13.4.2	<i>Mt Gravatt-Capalaba Road to Cleveland Branch Rail Line</i>	13.2
13.4.3	<i>Cleveland Branch Rail Line to Pinkenba Rail Line</i>	13.4
13.4.4	<i>Pinkenba Rail Line to Nudgee Road</i>	13.5
13.5	Groundwater Levels and Extent of Aquifers	13.6
13.5.1	<i>Mt Gravatt-Capalaba Road to Cleveland Branch Rail Line</i>	13.8
13.5.2	<i>Cleveland Branch Rail Line to Pinkenba Rail Line</i>	13.8
13.5.3	<i>Pinkenba Rail Line to Nudgee Road</i>	13.8
13.5.4	<i>Groundwater Recharge and Discharge</i>	13.11
13.5.5	<i>Tidal Influences</i>	13.12
13.6	Groundwater Quality	13.12
13.6.1	<i>Mt Gravatt-Capalaba Road to Cleveland Branch Rail Line</i>	13.12
13.6.2	<i>Cleveland Branch Rail Line to Pinkenba Rail Line</i>	13.13
13.6.3	<i>Pinkenba Rail Line to Nudgee Road</i>	13.13
13.6.4	<i>Potential Existing Groundwater Contamination</i>	13.19
13.7	Declared Groundwater Zones and Groundwater Users	13.19
13.8	Significance of Groundwater Resource	13.19
13.9	Potential Impacts	13.20
13.9.1	<i>Potential Construction Impacts</i>	13.20
13.9.2	<i>Potential Operational Impacts</i>	13.23
13.10	Mitigation Measures	13.23
13.10.1	<i>Construction Phase</i>	13.23
13.10.2	<i>Operational Phase</i>	13.25
13.11	Conclusions	13.26

14. Air Quality	14.1
14.1 Introduction	14.1
14.2 Methodology	14.1
14.3 Climatic Conditions	14.1
14.4 Description of the Air Quality	14.5
14.4.1 Air Quality Guidelines	14.5
14.4.2 Mt Gravatt – Capalaba Road to Cleveland Branch Rail Line	14.6
14.4.3 Cleveland Branch Rail Line to Pinkenba Rail Line	14.7
14.4.4 Pinkenba Rail Line to Nudgee Road	14.7
14.4.5 Background Air Quality	14.7
14.5 Air Quality Assessment Methodology	14.9
14.5.1 Traffic Data and Emissions Estimation	14.9
14.5.2 Construction Compounds	14.12
14.5.3 Distance to Residences	14.12
14.5.4 Dispersion Modelling Methodology	14.14
14.5.5 Greenhouse Gas Assessment Methodology	14.15
14.6 Climatic Considerations	14.16
14.7 Potential Air Quality Construction Impacts	14.16
14.8 Potential Operational Air Quality Impacts	14.17
14.8.1 Mt Gravatt – Capalaba Road to Cleveland Branch Rail Line	14.18
14.8.2 Cleveland Branch Rail Line to Pinkenba Rail Line	14.19
14.8.3 Pinkenba Rail Line to Nudgee Road	14.21
14.8.4 Greenhouse Gas Impacts	14.22
14.9 Summary of Impacts	14.24
14.10 Mitigation Measures	14.24
14.11 Conclusion	14.25
15. Noise and Vibration	15.1
15.1 Introduction	15.1
15.2 Noise Assessment	15.1
15.2.1 Acoustic Terminology	15.1
15.2.2 Applicable Noise Criteria	15.3
15.2.3 Noise Monitoring Locations and Methodology	15.6
15.2.4 Methodology and Instrumentation	15.9
15.2.5 Noise Monitoring Results	15.10
15.2.6 Noise Modelling Methodology	15.16
15.2.7 Construction Noise	15.24
15.2.8 Construction Noise Mitigation Measures	15.36
15.2.9 Operational Noise	15.36
15.2.10 Future Noise Monitoring	15.50
15.3 Vibration Assessment	15.50
15.3.1 Applicable Vibration Criteria	15.50
15.3.2 Construction Vibration	15.54
15.3.3 Operational Vibration	15.56
15.4 Conclusions	15.56

16. Terrestrial Ecology	16.1
16.1 Introduction	16.1
16.2 Mt Gravatt-Capalaba Road to Cleveland Branch Rail Line	16.3
16.2.1 Existing Flora	16.3
16.2.2 Existing Habitat Values	16.12
16.2.3 Existing Fauna	16.13
16.2.4 Potential Impacts	16.29
16.2.5 Mitigation Measures	16.35
16.3 Cleveland Branch Rail Line to Pinkenba Rail Line	16.39
16.3.1 Existing Flora	16.39
16.3.2 Existing Habitat Values	16.43
16.3.3 Existing Fauna	16.43
16.3.4 Potential Impacts	16.55
16.3.5 Mitigation Measures	16.58
16.4 Pinkenba Rail Line to Nudgee Road	16.59
16.4.1 Existing Flora	16.59
16.4.2 Habitat Values	16.65
16.4.3 Fauna	16.67
16.4.4 Potential Impacts	16.81
16.4.5 Mitigation Measures	16.83
16.5 Conclusions	16.85
17. Aquatic Biology	17.1
17.1 Introduction	17.1
17.2 Survey and Sampling Methods	17.1
17.2.1 Survey Sites and Timing	17.1
17.2.2 Sampling Methods	17.5
17.2.3 Sampling Event	17.6
17.2.4 Seasonal and Temporal Variation of Estuarine Fauna	17.6
17.3 Mt Gravatt-Capalaba Road to Cleveland Branch Rail Line	17.7
17.3.1 Description of Existing Aquatic Biology	17.7
17.3.2 Potential Impacts	17.14
17.3.3 Impacts of Design	17.14
17.3.4 Impacts of Construction	17.15
17.3.5 Potential Impacts of Operation	17.16
17.3.6 Section Specific Mitigation Measures	17.18
17.3.7 Rehabilitation of Riparian and Aquatic Habitat	17.19
17.3.8 Mitigation of Impacts on Water Quality	17.19
17.3.9 Mosquito Management	17.20
17.4 Cleveland Branch Rail Line to Pinkenba Rail Line	17.20
17.4.1 Description of Existing Aquatic Biology	17.20
17.4.2 Potential Impacts	17.23
17.4.3 Potential Impacts of Operation	17.24
17.4.4 Section Specific Mitigation Measures	17.24
17.5 Pinkenba Rail Line to Nudgee Road	17.25
17.5.1 Water Quality	17.25
17.5.2 Aquatic Flora	17.26

17.5.3	<i>Aquatic Fauna</i>	17.33
17.5.4	<i>Potential Impacts</i>	17.35
17.5.5	<i>Potential Impacts of Operation</i>	17.37
17.5.6	<i>Section Specific Mitigation Measures</i>	17.37
17.6	<i>Aquatic Ecological Values of Western Moreton Bay</i>	17.38
17.7	<i>Conclusions</i>	17.39

Volume 2 Appendices List

Appendix Number	Name
A	Terms of Reference
A1	Final Terms of Reference
A2	EIS Matters in Schedule of State Development and Public Works Organisation Regulation 1999
A3	Terms of Reference Cross Referencing Table
B	EPBC Referral Determination
C	Sections 1 and 2 – Alignment Review and Concept Development
D	Land Use Section Supporting Information
D1	Brisbane City Plan 2000 – The Strategic Plan Maps
D2	Compliance with Relevant State, Regional and Local Policies
D3	BAC Master Plan Land Use Areas
D4	TradeCoast Central Master Plan
E	Transportation Section Supporting Information
E1	Motorway Screenline
E2	Average Travel Speeds
E3	The Traffic Modelling Process
E4	Population Forecast Sectors
E5	Summary of Network Assumptions for Modelling Purposes
E6	Network Performance Details
E7	Potential for Induced Traffic and Diversion from Public Transport
F	List of Potential Utility Service Conflicts
G	Soils Section Supporting Information
G1	Land Survey Summary
G2	EMR and CLR Search Results
G3	UXO Desktop Assessment
G4	Aerial Photography Summary
H	Hydraulic Assessment Report
I	Surface Water Quality Data
J	Air Quality Section Supporting Information
J1	Wind Roses
J2	Pollutant Emissions Rates

Appendix Number	Name
J3	Air Quality Modelling Results
K	Noise and Vibration Technical Data
K1	Photographs and Detailed Description of Microphone Locations
K2	Statistical Noise Level Graphs
K3	Attended Noise Measurement Results and Observations
K4	Locations of Noise Sensitive Receivers
K5	Future (2021) Predicted Noise Levels with No Mitigation
K6	Colour Noise Contour Plots – 2021 No Mitigation – Single Storey (2.0m above ground)
K7	Colour Noise Contour Plots – 2021 No Mitigation – Two Storey (4.5m above ground)
K8	Vibration Buffer Zones and Buildings – Requiring Condition Surveys
K9	Future (2021) Predicted Noise Levels with Mitigation
K10	Colour Noise Contour Plots – 2021 with Mitigation – Single Storey (2.0m above ground)
K11	Colour Noise Contour Plots – 2021 with Mitigation – Two Storey (4.5m above ground)
K12	Noise Barrier Locations
L	Terrestrial Ecology Supporting Data
L1	Terrestrial Flora Species List
L2	Terrestrial Fauna Species List and Search Data
L3	Belmont Hills Bushland Canopy Vegetation Communities
L4	Koala Car Hit Data
M	Aquatic Biology Section
M1	Ecological Values of Aquatic Flora and Fauna
M2	Conservation Significance of Aquatic Fauna
M3	Recreational and Commercial Significance of Aquatic Fauna
M4	Potential Impacts Associated with Runoff
M5	Aquatic Flora and Fauna Values of Western Moreton Bay
M6	Stakeholders Comments
M7	Recognition of the Ecological Significance of the Region in Legislation and Other Instruments
M8	Aquatic Flora and Fauna of Study Area
M9	Key Components of South East Queensland Estuarine Ecosystems

Appendix Number	Name
N	Cultural Heritage Survey and Assessment for Proposed Brisbane GUP
O	Consultation and Communication Report
P	Landscape and Visual Amenity Supporting Information
P1	Photo Views of Visual Features
P2	Landscape and Urban Design Treatments
P3	Matrix of Urban Design Treatments
Q	Draft Cultural Heritage Management Plan
R	EIS Study Team Qualifications

Figures List

Figure No.	Name
1.1	General Project Details
1.2	Summary of Key Legislative Requirements for the Project
2.1	National Highway and Major Road Network in the Greater Brisbane Area
2.2	Planning Study Route Options
3.1	General Project Layout
3.2	Project Program
4.1	Existing Land Uses
4.2	Brisbane City Plan Generalised Area Classifications
4.3	Australian TradeCoast Local Plan
5.1	Existing Road Hierarchy
5.2	Gateway Bridge Peak Direction Trip Catchments
5.3	Gateway Bridge Peak Northbound Morning Traffic Flows
5.4	Gateway Bridge Peak Southbound Evening Traffic Flows
5.5	Gateway Bridge Daily Traffic Variations
5.6	Gateway Bridge Historical AADT Traffic
5.7	Existing Motorway Tolling Locations
5.8	BSTM Modelling Framework
5.9	Road Network Improvements
5.10	Approximate Location of NSBT Proposal
5.11	Approximate Location of TransApex Proposal
5.12	Future Base Traffic (Without GUP) 2011 Network – AM Volume/Capacity Ratios
5.13	Future Base Traffic (Without GUP) 2011 Network – PM Volume/Capacity Ratios
5.14	Future Base Traffic (Without GUP) 2021 Network – AM Volume/Capacity Ratios
5.15	Future Base Traffic (Without GUP) 2021 Network – PM Volume/Capacity Ratios
5.16	Effect of Tolls Levels on Traffic Volumes in 2021
6.1	Bikeway Network
9.1	Topography
9.2	Regional Geology
9.3	Simplified Subsurface Profile for North of Brisbane River
10.1	Dominant Soil Types
10.2	Land Survey Plan
10.3	Acid Sulphate Soils

Figure No.	Name
10.4	Land Parcels on EMR
10.5	Potential Soil Risks
11.1	Bulimba Creek and Surrounding Environment
11.2	Bulimba Creek Base Case MIKE 21 Model Results – 100 yr ARI Event
11.3	Bulimba Creek – Impact of Proposed Works
11.4	Bulimba Creek – Preferred Mitigation Option – MIKE 21 Model Results
11.5	Kedron Brook and Surrounding Environment
11.6	Kedron Brook Base Case MIKE 21 Model Results – 100 yr ARI Event
11.7	Kedron Brook – Impact of Proposed Works
11.8	Kedron Brook – Preferred Mitigation Options – MIKE 21 Model Results
12.1	Surface Water Quality Sampling Locations
13.1	Historic and Existing Groundwater Monitoring Sites
13.2	Bore Water Levels
14.1	Wind Rose for all Hours for the Eagle Farm EPA Monitoring Site (January 1997 to September 2003)
14.2	Mixing Height Profiles for Eagle Farm
15.1	Graphical Display of Typical Noise Indices
15.2	Background Noise Monitoring Locations
16.1	Ecological Features
16.2	Koala Sightings
17.1	Aquatic Ecology Sampling Sites
17.2	Coastal Wetlands Significance
17.3	SIGNAL 2 Biplot for Habitats Sampled at Bulimba Creek 1
17.4	Ecological Features
17.5	Preliminary Characterisation of Mangrove Habitats at Brisbane Airport
17.6	Netting Closure Areas in the Vicinity of Brisbane Airport and Kedron Brook Floodway (Quinn 1992)
17.7	Moreton Bay Ramsar Wetlands
18.1	Cultural Heritage Study Areas 1 & 2
18.2a	Cultural Heritage Study Area 4
18.2b	Cultural Heritage Study Area 3
18.3	Cultural Heritage Survey Area 1 (Airport Drive Precinct to Kedron Brook Floodway)
18.4	Sites of European Cultural Significance
19.1	Study Area for Demographic Analysis

Figure No.	Name
22.1	Landscape Features
22.2	Landscape Character Units and Visual Features
22.3	View Shed Catchment
22.4	Landscape Concept Plan Mitigation Measures
22.5	Suggested Urban Design Mitigation Measures
