## F. Impacted properties

This appendix details the properties and interests traversed by the permanent and temporary footprints for the NSW/QLD Border to Gowrie Project (the Project).

Project definitions of relevance to this appendix are as follows:

- ▶ **Temporary footprint:** The area that would be directly affected by construction works (also known as the construction footprint). It includes the location of proposal infrastructure, the area that would be directly disturbed by the movement of construction plant and machinery, and the location of the storage areas/compounds sites etc, that would be used to construct that infrastructure.
- ▶ **Permanent footprint:** The land required to encompass permanent infrastructure components of the Project. This includes the rail corridor, access tracks, signalling infrastructure, bridge maintenance infrastructure and the like.

### F.1 Methodology

In identifying and calculating the areas of the properties and interests traversed by the permanent and temporary footprints, geographic information system (GIS) calculations were undertaken utilising the spatial datasets detailed within Table F.1 .

**TABLE F.1: DATASETS**

| Dataset name  | Datatype   |
|---|--|
| Queensland Digital Cadastral Database (DCDB) (Queensland Government 2019) | The DCDB contains the property boundaries and related property description of all land parcels in Queensland.  |
| Survey Accurate Cadastral Map (Downes Group 2019 & ARTC 2019)             | Geodatabase utilised survey data provided to ARTC by Downes Group adjusted in GeoCadastre created from the feature manipulation engine process to produce single polygons (not stacked). |
| Queensland Land Use Mapping Program (QLMUP) (Queensland Government 2019)  | The QLUMP dataset is digital map of the most recent land use of Queensland. Land use is classified according to the Australian Land Use and Management Classification.                   |

The dataset created for the GIS calculations to identify impacted properties consists of the DCDB, modified and combined with survey accurate cadastral data where available. The process of creating this combined dataset consisted of manually realigning lot boundaries to produce a single-level layer of contiguous polygons, honouring the survey accurate cadastral dataset over the DCDB boundaries for spatial accuracy.

In addition to producing the single-level layer of continuous polygons, overlaying parcels were removed from the dataset and interrogated separately to avoid the duplication of areas calculated. This included easement parcels which overlay other land parcels and land parcels with tenure of Land Lease which overlay State Forest tenure. Duplicate lots were also not included.

When identifying the predominant land use of the impacted properties as mapped by QLUMP, multiple land uses may be mapped within the one allotment. In such instances the land use which takes up the majority of the land within the footprint has been included for the purposes of the impacted properties list.

### F.2 Impacted properties

Between the NSW/QLD border and Gowrie the permanent footprint for the Project encompasses, in whole or in part, 440 properties and 34 easements. The temporary footprint encompasses, in whole or in part, 542 properties and 43 interests.

The extent of area associated with these properties within the permanent and temporary footprints, as well as tenure and existing land uses of these properties, are detailed in Table F.2.

The data presented within Table F.2 is based on the footprints established for the reference design and derived using the datasets listed in Table F.1. Consequently, the outputs in Table F.2 are not to be used for the land acquisition process.

**TABLE F.2: PROPERTIES AND INTERESTS TRAVERSED BY THE PERMANENT AND TEMPORARY FOOTPRINTS**

| Lot/Plan  | Area of lot (ha) | Area of lot within permanent footprint (ha) | % of lot within permanent footprint | Area of lot within temporary footprint (ha) | % of lot within temporary footprint | Tenure   | Predominant land use (QLUMP) |
|---|------------------|---|-------------------------------------|---|-------------------------------------|----------|------------------------------|
