

LOWER FITZROY RIVER INFRASTRUCTURE PROJECT

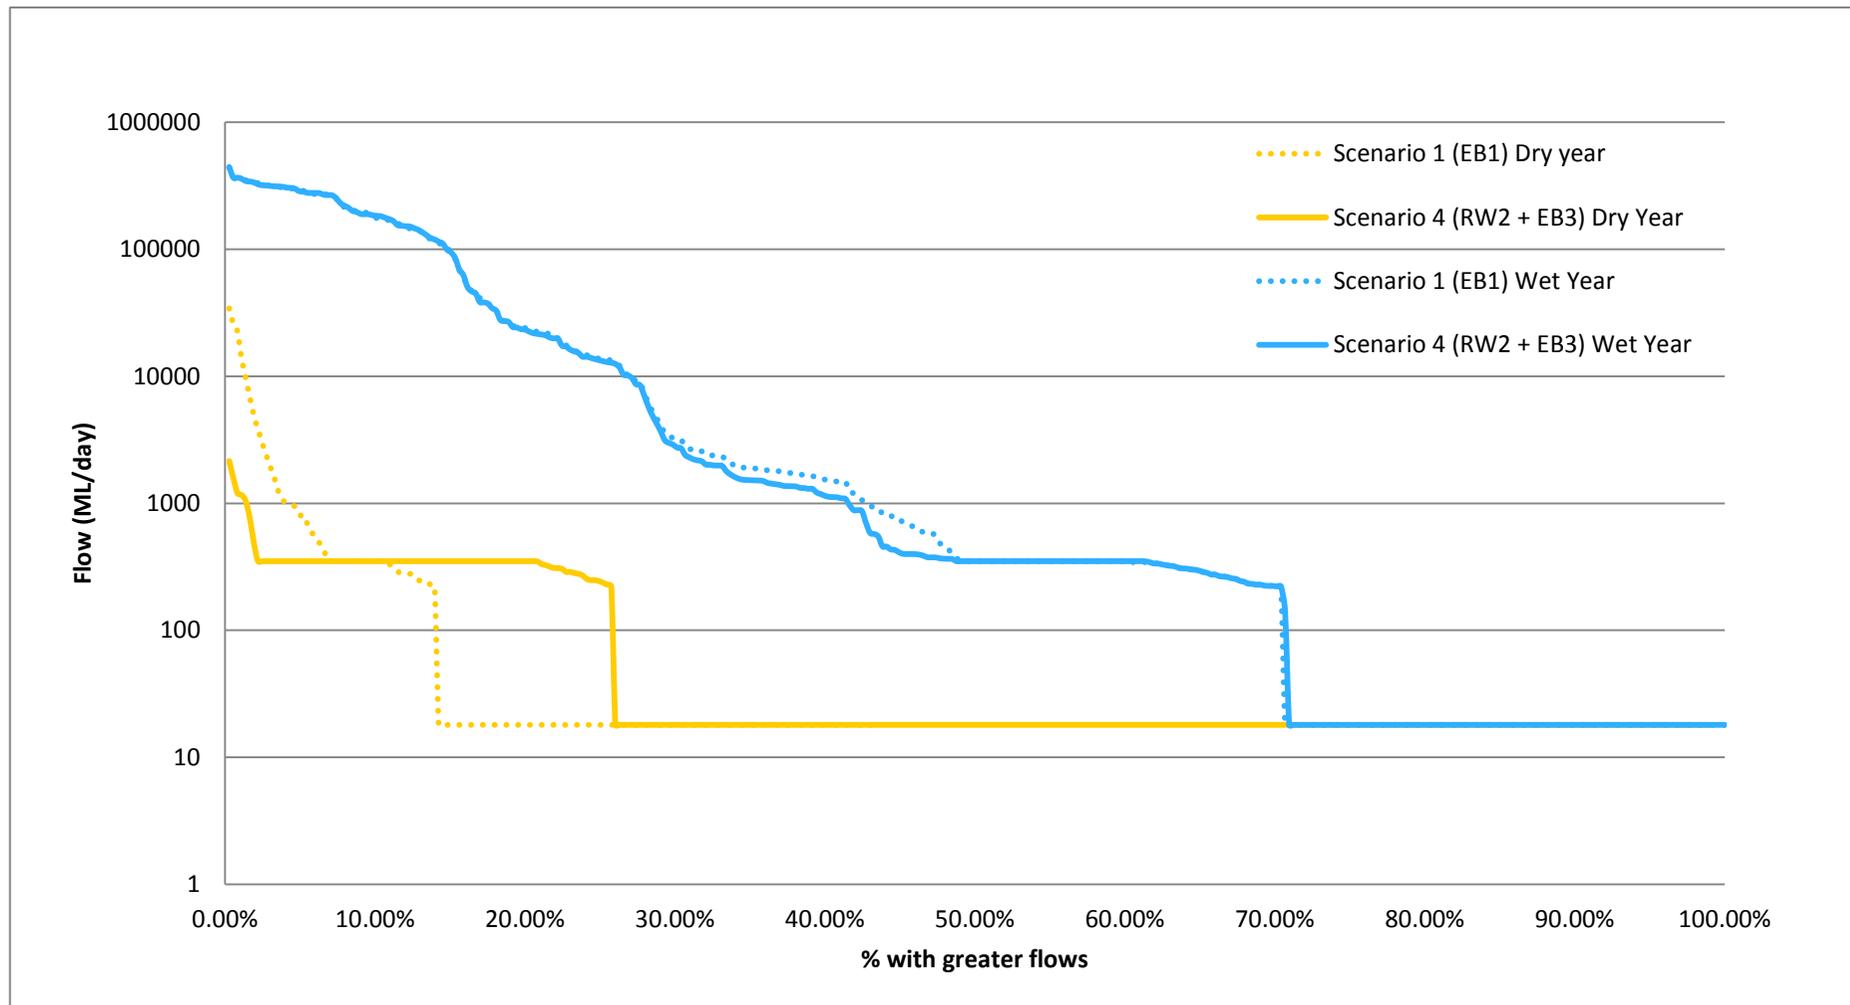

Appendix I

Sensitivity analysis (wet and dry years) daily flow duration curves

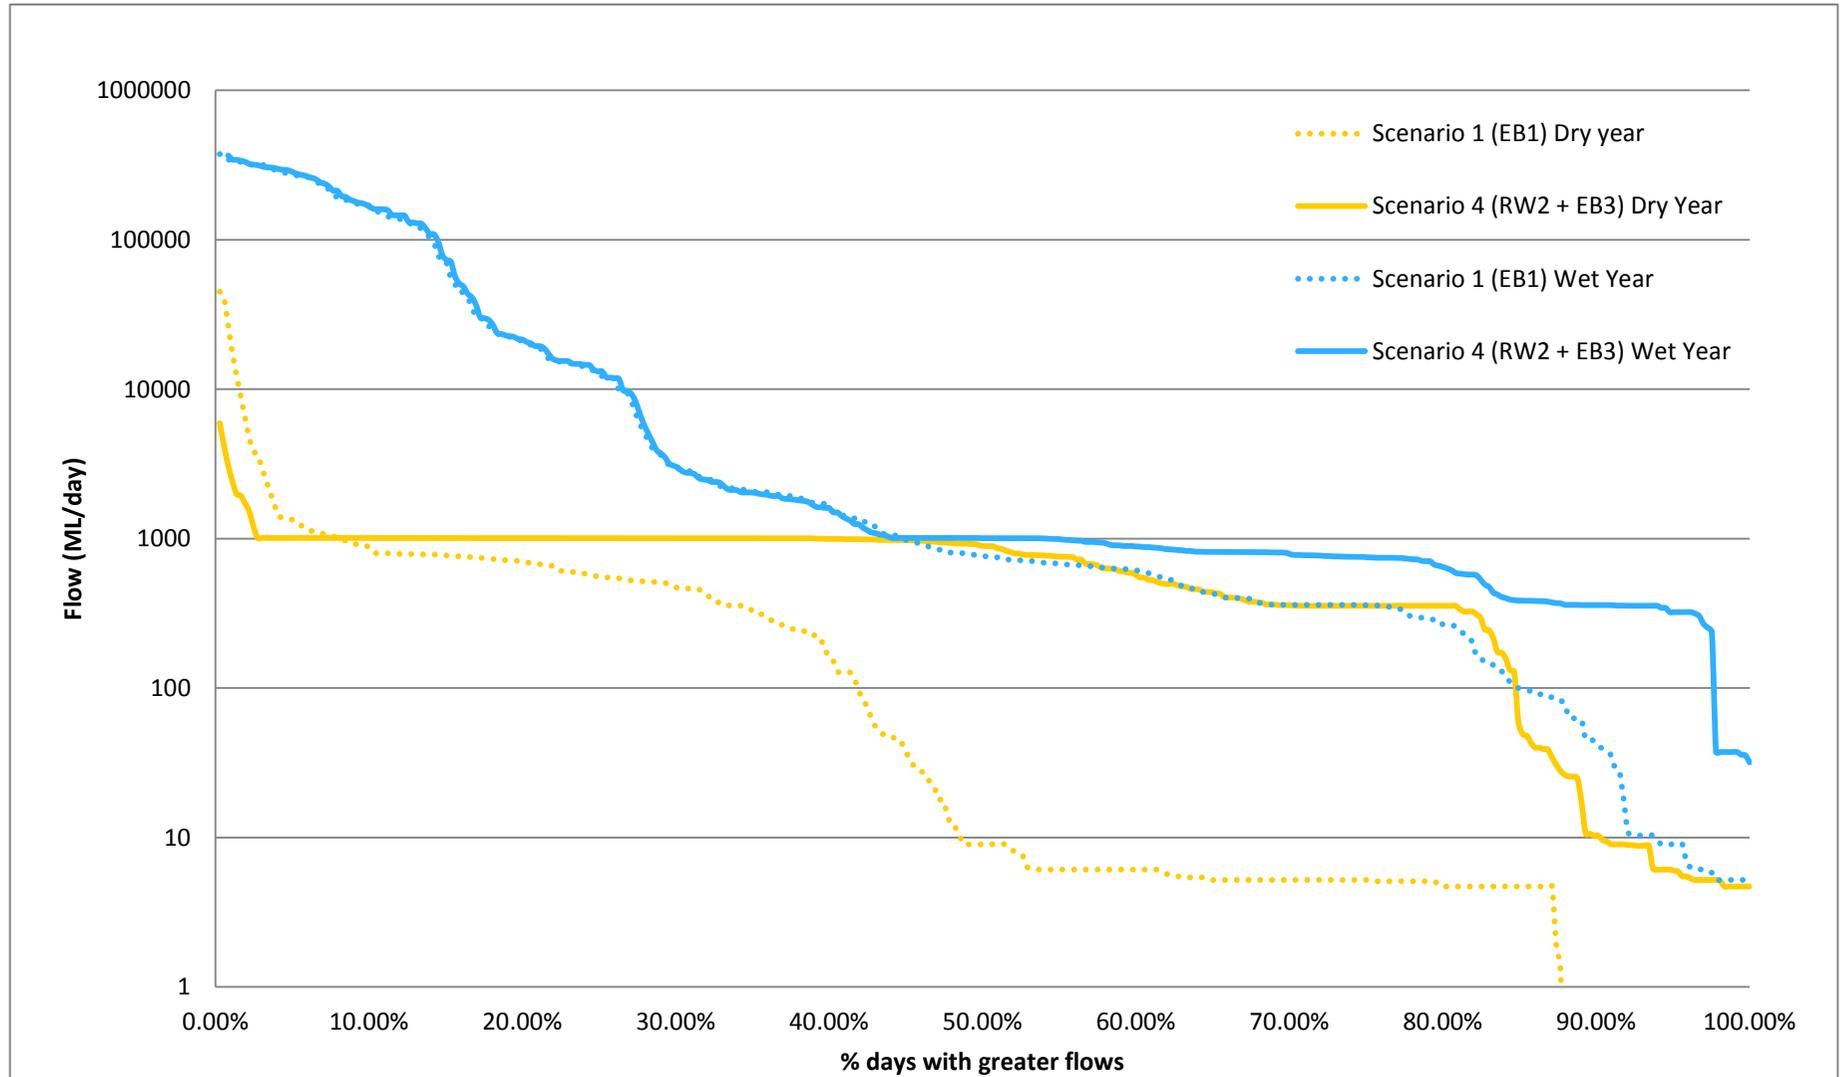

THIS PAGE IS LEFT INTENTIONALLY BLANK

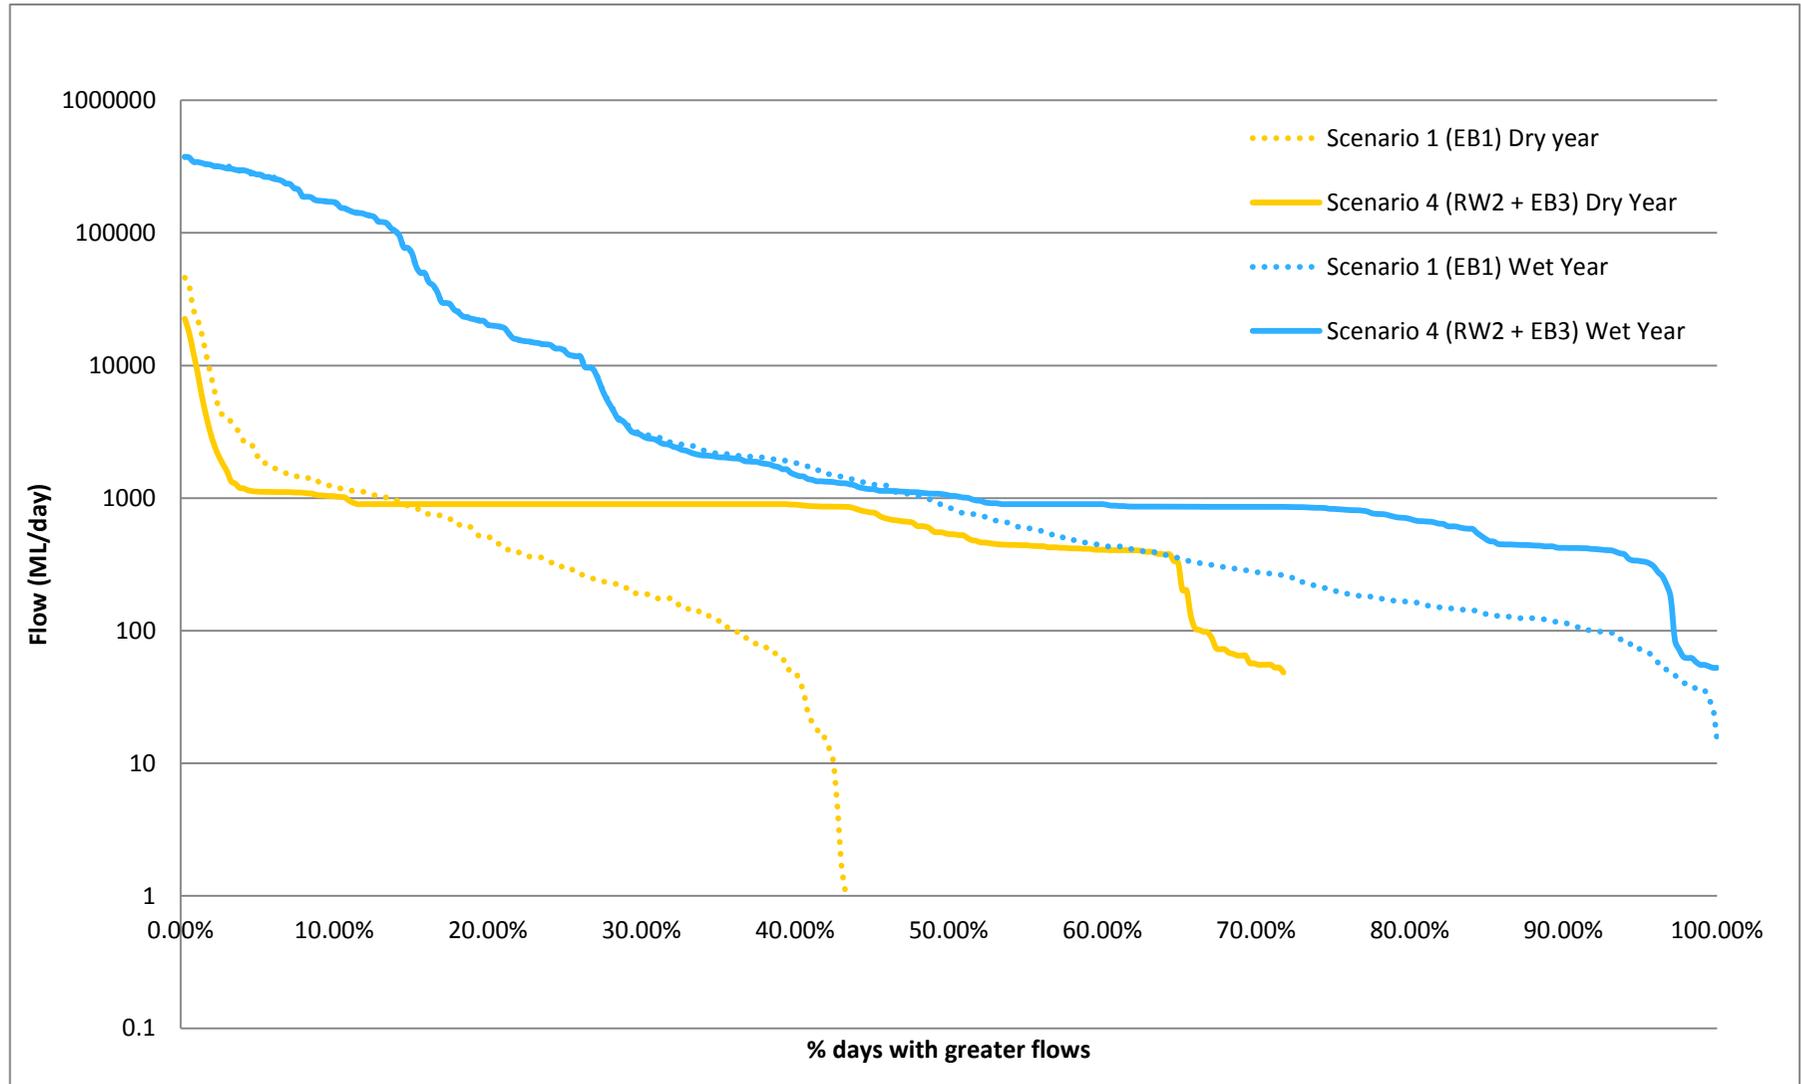

I1 Daily flow duration curve at data location IQQM1 (end of system; Node 249)

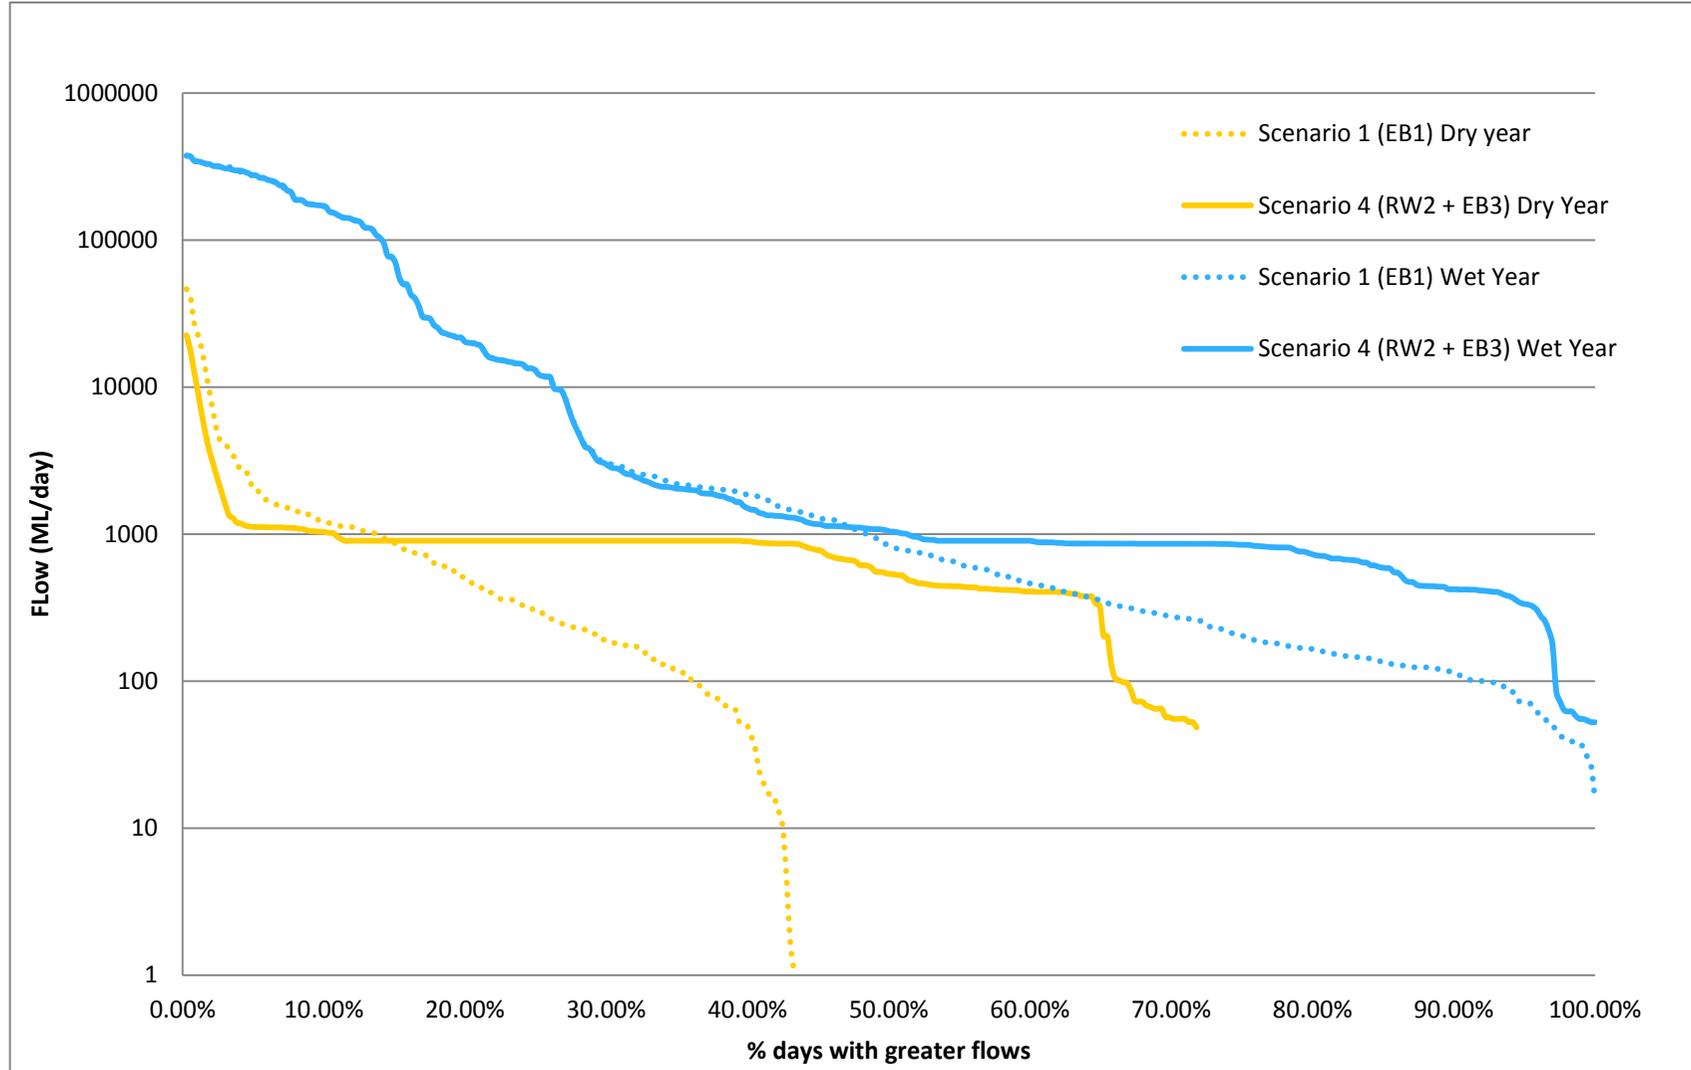

I2 Daily flow duration curve at data location IQQM2 (Wattlebank; Node 002)

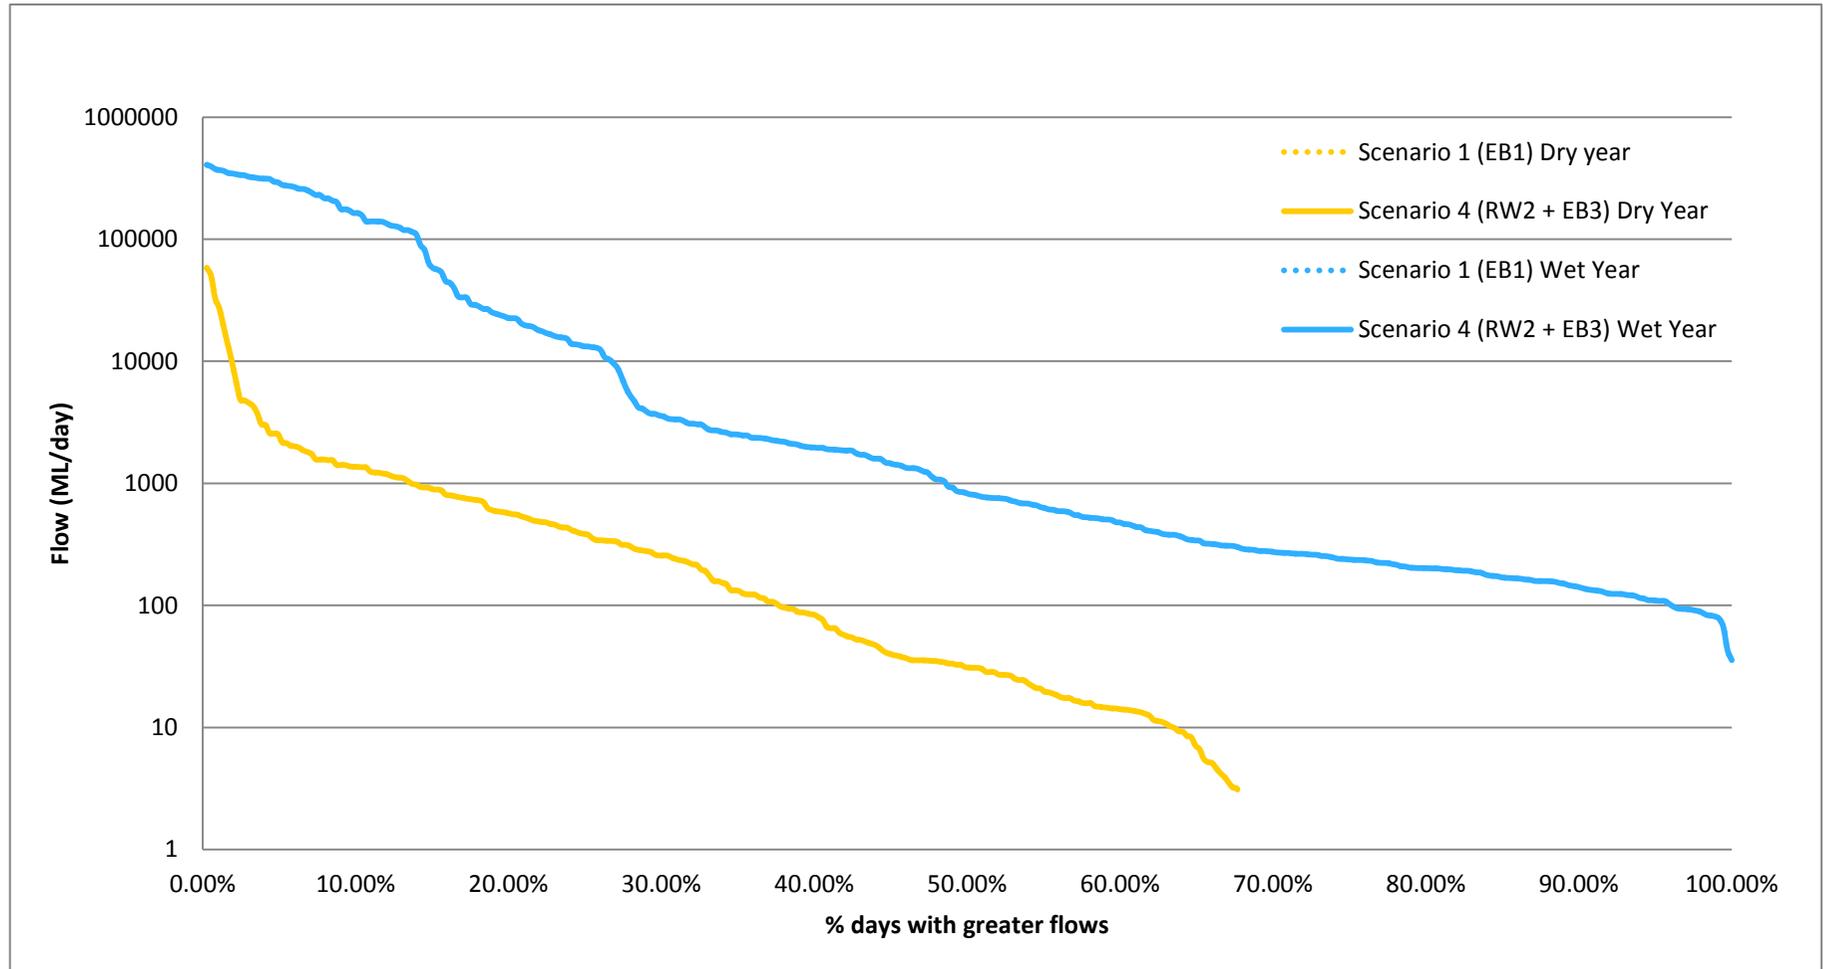

I3 Daily flow duration curve at data location IQQM3 (The Gap; Node 005)

14 Daily flow duration curve at data location IQQM4 (downstream of the proposed Rookwood Weir; Node 443)

15 Daily flow duration curve at data location IQQM5 (Riverslea; Node 003)

At data location IQQM5 (Riverslea; Node 003) flow data represents inflows to the system. As Rookwood Weir does not impact on inflows it is expected that pre- and post-project flows are the same as is reflected on the flow duration curves above.
