

## 1 LNG COMPONENT - ENVIRONMENTAL MANAGEMENT PLAN

Draft Environmental Management Plans (EMP) for construction and operation of the LNG Facility were provided as *Volume 11* of the Queensland Curtis LNG (QCLNG) Project draft environmental impact statement (EIS). The content of these EMPs will continue to be revised through stakeholder consultation, as well as ongoing refinement of Project construction planning and detailed design. Final EMPs will be issued as part of QGC's application for an environmental authority to conduct *Chapter 5* activities following the setting of Project by the Coordinator General.

As the draft EMPs will remain the subject of negotiations with regulators, and as no major changes to most of the draft EMPs have been made following submission of the draft EIS, the EMPs as submitted in the draft EIS have not been reproduced here. However, ongoing planning for construction has resulted in further development of four draft Construction Phase EMPs / management strategies. Drafts of these are included as Appendices to this volume, and are tabulated in *Table 11.1.1* below. Note that as for EMPs submitted with the draft EIS, these will continue to be developed and refined prior to finalisation before commencement of construction activity on the LNG Facility site.

**Table 11.1.1 Supplementary EMPs**

Supplementary EIS Draft EMP Title	Supplementary EIS Appendix Number	Relationship to draft EIS <i>Volume 11</i>
Vegetation Clearing Strategy	<i>Appendix 11.1</i>	Provides further detail for the construction phase Terrestrial Ecology EMP included as <i>Section 2.1.12</i> of the draft EIS.
Weed and Pest Management Plan	<i>Appendix 11.2</i>	Supersedes the construction phase Weed and Pest Management Plan included as <i>Section 2.1.5</i> of the draft EIS.
Spoil Disposal Revegetation and Rehabilitation Plan	<i>Appendix 11.3</i>	Supersedes description of management of Cleared Timber (Vegetation waste) provided in the Waste Management Plan included as <i>Section 2.1.17</i> of the draft EIS.
Acid Sulfate Soil Management Plan Framework	<i>Appendix 11.4</i>	Supersedes the construction phase Acid Sulfate Soils (ASS) Management Plan included as <i>Section 2.1.10</i> of the draft EIS.
