

## 2 CLIMATE AND CLIMATE CHANGE

### 2.1 INTRODUCTION

This chapter provides responses to submissions received on the Queensland Curtis LNG (QCLNG) Project draft environmental impact statement (EIS) related to the impacts of climate and climate change on the Gas Field Component.

Where changes to the project description, as detailed in *Volume 2, Chapter 7* and *Chapter 11*, are impacted by climate and climate change, these impacts, and measures to mitigate impacts are described.

### 2.2 RESPONSES TO SUBMISSIONS

*Table 3.2.1* provides a summary of the submissions received on impacts of climate and climate change on the Gas Field and a response to those submissions.

Project greenhouse gas emissions are assessed in *Volume 7*.

**Table 3.2.1 Responses to Submissions on the Draft EIS**

Issue Raised	QCLNG Response	Relevant Submissions(s)
The EIS does not consider the Project's greenhouse gas emissions.	<i>Volume 7</i> of the draft EIS and <i>Volume 7</i> of the supplementary EIS describe the Project's greenhouse gas emissions and measures to minimise emissions.	25

### 2.3 CHANGES TO PROJECT DESCRIPTION

Changes to the Project description do not result in a change to the assessment of the impacts of climate and climate change on the Project.
