

Appendix D

CONSULTATION DETAILS

Table D-1: Community Engagement Stakeholders

Activity	Detail	Method of Engagement
Directly affected landowners	56 distinct landowners directly impacted by the preferred coal/freight alignment.	One-on-one meetings Telephone conversations; 1800 hotline Formal correspondence Project newsletter/fact sheets Community information days Email
Adjacent landowners	36 distinct private property owners also located within the Surat Basin Rail study area; however, not directly impacted by the preferred alignment.	One-on-one meetings Telephone conversations; 1800 hotline Formal correspondence Project newsletter/fact sheets Community information days Email
Public sector	Key Council members, including planning and engineering staff. Key government departments and agencies.	Engaged by the wider project team through one-on-one meetings, group briefings, formal correspondence, and telephone conversations.
Elected representatives	Elected representatives within the Banana Shire and Dalby Regional Council.	Engaged by the wider project team through one-on-one meetings, group briefings, formal correspondence, and telephone conversations.
Cultural heritage stakeholders	Both Indigenous and European cultural heritage stakeholders, including representative Aboriginal groups and historical societies.	One-on-one meetings Telephone conversations; 1800 hotline Formal correspondence Project newsletter/fact sheets Email
Key community and environment groups	State and national groups.	Formal project correspondence inviting enquiries and offers of briefings. Availability of project contact points. Email updates (if registered)
Local community and environment groups	Wildlife Preservation Society (QLD). Landcare Queensland. Dawson Valley Development Association. Wandoan Progress Association.	One-on-one meetings Telephone conversations; 1800 hotline Formal correspondence Project newsletter/fact sheets Email Email updates (if registered)

Activity	Detail	Method of Engagement
Local community	Local residents and businesses surrounding the Surat Basin Rail project.	1800 hotline Newsletters Community information days Website Email address Email updates (if registered)
Broader community and public	Broader public in regional and other parts of Queensland.	1800 hotline Email address Website Email updates (if registered)
Service authorities	Water, power and gas authorities. Emergency services.	Engaged by the wider SBR project team as part of EIS development, including cooperation and information sharing for co-location opportunities.

Appendix D.5

Graham Dooley
CEO
Surat Basin Rail

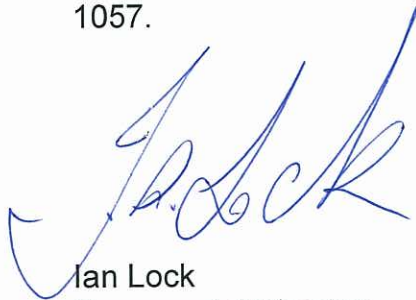

Graham

As discussed, the State has requested details of QR's progress on the potential upgrades to the Moura system to accommodate rail traffic from the Surat Basin Railway as a part of your EIS documentation.

QR has undertaken some pre-feasibility works on this corridor which provide only very high level indications of upgrades required. A full feasibility study is currently planned for 2009, subject to resolution of commercial matters with mining companies.

We are currently seeking advice from potential mines of the volumes of traffic we should assess. In parallel we are negotiating commercial agreements to support the proposed feasibility study.

If SBR or the State require any further clarification please contact me on 3235 1057.

A handwritten signature in blue ink, appearing to read 'I. Lock'.

Ian Lock
Commercial Director
